

AI FAQ ASSISTANT API

Coding & Solution

Implementation summary

TEAM ID	SWTID-2026-8832
TEAM SIZE	5
TEAM	Gokulakrishnan K (Leader); Arunkumar M; Dhina S; Siva A; Gowtham M
DATE	30 September 2026

Authentication

Registration validates, rejects duplicate email, hashes passwords via User pre-save hook, and returns JWT. Login compares password and issues token. Profile returns req.user.

FAQ management

Public list/read/search and authenticated create/update/delete are implemented. FAQ records reference their creator; mutations check ownership.

AI features

Protected answer and FAQ-generation endpoints validate inputs and call Gemini. FAQ generation requests structured JSON with question and answer fields.

Application

Express loads dotenv, CORS, JSON and urlencoded parsers, health route, API groups, not-found handling, and centralized errors.

Functional inventory

- Health endpoint.
- Registration, login, protected profile.
- Public FAQ list, detail, and keyword search.
- Authenticated FAQ create, owner-only update/delete.
- AI answer generation.
- AI FAQ pair generation.
- Input validation, JWT middleware, centralized error handling.
