

AI FAQ ASSISTANT API

Demonstration of Proposed Features

Suggested API walkthrough

TEAM ID	SWTID-2026-8832
TEAM SIZE	5
TEAM	Gokulakrishnan K (Leader); Arunkumar M; Dhina S; Siva A; Gowtham M
DATE	30 September 2026

Prepare

Start configured server and test database; import Postman collection; use synthetic account and FAQ content.

Sequence

- Open health route.
- Register and log in; obtain token.
- Call protected profile.
- Create FAQ as authenticated user.
- List, retrieve, and search FAQs publicly.
- Update/delete as owner; explain non-owner rejection behavior.
- Call AI answer and AI FAQ generation.
- Show a validation error and explain dependency failure behavior.

Collection and script

Use Postman collection for manual walkthrough. `test_api.js` includes a broader sequential integration scenario. Do not describe either as passed unless run results are observed.

Safety

Hide API keys, JWTs, and personal content. If Gemini is unavailable, explain the configured dependency and show request/code instead of presenting fabricated output.
