Find content

Public GET /api/faqs, GET /api/faqs/:id, and GET /api/faqs/search?q=... expose read and search behavior.

Maintain trusted content

Authenticated users create FAQs; update and delete handlers compare createdBy to req.user and reject non-owners.

Improve answer drafting

Protected AI endpoint provides direct question answers; another generates a structured question-answer pair from a topic.

Supporting security

Registration/login, hashed passwords, JWT middleware, input validation, and centralized errors support the main flows.

Fit evidence

Source includes models/routes/controllers, Postman assets, and a test script. No user validation, analytics, or adoption evidence was supplied.
